

8/26

Dear Sylvia,

Hope you had a  
fine summer. I did "  
Perhaps, the case  
is less complex than  
we thought.

Consider. "  
Orwood's first crime."  
Wacker shooting.

Wacker total summer  
that H.S.C.A. photo of "Wacker  
Bullet" is not in fact  
Wacker Bullet!

Tomlinson could not  
identify photo of "Maggie  
Bullet" and O.P. Wright  
denied its authenticity.

"You have analyzed  
palm print, back of  
photographs of which Marino  
took one, then two, then  
three.

Swain newspaper  
in the H.S.C.A. Photograph  
Section. The Pablam testimony  
which is completely at  
variance with Barbara.

Even to the day after  
the drawing of the back  
of Kennedy's head appears  
to conflict with the

Zaphuolok term.

Gunn's oral remark about the fragments digging, other fragments "missing", the brain "missing", the allegation - despite contrary testimony - that best photographs were "never taken", the "official story", often repeated, of calling a fragment(s) "a missile" -----

Of course, the key question is why did Admiral Kennel state that the autopsy not be completed and the remains not be tracked?

Given the Humer little size and the Stovak memo the evidence points to a Pentagon plot.

All this came too early for a Make Aweau-creative cover-up.

We have ritualized evidence which may "and probably is not evidence".

Like the manipulation of reality by Conrads in form Faulster novel, The Magus.

What do you think?  
Sincerely,
