

1Date 4/24/64

ROY S. TRULY, Warehouse Supervisor, Texas School Book Depository (TSBD), 411 Elm Street, Dallas, Texas, advised that he recalls that on the afternoon of November 22, 1963, following the assassination of President KENNEDY, that Lieutenant CARL DAY, of the Dallas Police Department Crime Laboratory, was collecting numerous items of possible evidentiary value, with the assistance of several detectives, on the premises of the Depository Building. TRULY advised, however, he does not specifically recall accompanying Lieutenant DAY to the sixth floor of the TSBD to remove a piece of molding from the window believed to have been used by LEE HARVEY OSWALD in the commission of the assassination of President KENNEDY.

TRULY accompanied interviewing Agents to the sixth floor of the Depository Building and pointed out the window believed used by OSWALD. The window was observed to be a wooden frame, double-hung window, containing four lights in each window half, and was located on the southeast corner opening to the south. TRULY, through tape measurements, determined the window to be 39 1/2" wide by 70 7/8" high and containing eight 15 5/8" by 17 5/8" glass lights. Examination of the window sill determined that a 3/4" strip of wooden molding was missing and TRULY advised the window had been untouched since the assassination and, as it was the only window with this piece missing, he believed this strip of wood in question probably had been removed from the sill by Lieutenant DAY. Examination of the sill disclosed four nail holes. Measuring from the east end of the window to each of the four nail holes, the following distances were noted:

1 5/8"; 14 9/16"; 26 1/16"; 38 1/16"

TRULY pointed out that each of the adjacent windows of similar type had a 3/4" thick molding for weather stripping purposes running along the sill, and that this particular window was the only one with this strip missing.
