It was a short night but the end run around the national deak at the wafest wanted and if the midnight and 1:30 a.m. cals from wat are correct, secred as much of a touch-down as a back not in circulation can seers.

Only when the paper comes this merming there will be no box for it. That was vandalized while I was making a brendont by phone just before II p.m. This time the conget the vandals, where wrockage was extensive throughout the area. And the extent thing is that the one who I'd have suspected and who know it is the one who pk came by while I was brendonsting, told hil, who told me, who told the cope, and they catch his brether as the ringleader. I can't believe he didn't recognize his brether's car.

So, after the police report I started preparing for this a.m.'s prectomony and fortunately had completed the first step (they do it in two steps new if your shockup doom't include one, the second in the a.m.) and was just finished bathing when bil called no to the phone, saying it was AP.

If its story is signed, I get the name as Margaret Shirk, who did but was pleasant. She teld me the Peat's is a rather big story. I didn't ask by play, length or both. I'll find out soon enough asympy.

What she wanted to do is shock each and every quote she'd decided to use, which tells me that the AP's story if not the Post's will be all anti-CIA and anti-PBI unless they find semeane also to quote. Well, it took some time because I haven't read the book and haven't read the transcript since I did the writing. I was glad for the blurbing you'll see as the back! It directed so.

I know Relear's intent because he spent more than two days on the story. Three calls yesterday, the reason I have no snow tires on while the wind blows like a winter storm. And cash quote was 100% correct. I think she was troubled by the spentaneous language, which was not grammatical.

The asked me if the was the first time the document was ever used and I replied, "No. Jerry Ford stale it, correspect it and sold parts of it in 1965. I didn't hear the gasp but I did hear the silence. So I added, "I den't expect you or anyone close to use that." Smicker, Agreement.

I'd not quite fallon aulosp when the police phonod with their report. I'll have to decide whether to press charges. Should and den't went to.

"ack to bed and can't alsop and at 1:30 Shirk wants to know is these are "minutes." I explain the difference and what a transcript is and she is pleasantly apolagatio. I didn't sloop easily or much, I suppose because there may not be a book on sale this morning with all that play in Washington and because I had no call from New York, which made no wander if friend"artin had come through. "I even if he'd getten the book.

If the AP story gots a HIC play perhaps a couple of backs will be an unle. lesser delayed shipping the becks-he alone had thom-until I was there a week age. He had them before the account amphis trip. And I don't know why he didn't get around to shipping the art work on the whelesalor's ad. It was some before we left, tee.

IN DC, if the printer kept his word and delivered to the wholesaler, the wholesaler's drivers are on strike. We hit it perfectly and perhaps this had to de with my sleeplesaness.

I hope the Post syndicates the piece.

Mad part is that this is one of bil's two awayofron-home workdays and I have this checkup for which I have to leave in about 30 minutes. So there will be nebody to take a call abould there be any.

AP's past attitude in DC, killing written stories, led me not to think of them. At UPI the new shief has for years been a secret believer. But when I phoned them and arraned for an advance copy they never picked it up.

I am inclined to believe that midnight was rather late to pick up a Post story. The edition has to be out earlier. So, I wender if there had to be a high policy decision.

Best.
