

Dwar Bill,

11/8/93

I New York Lawyer friend I did not consult on my C & G problem plans to use the ad on the other side to sue RH because he says that violates a state law. He had asked me to be alert to that ad as distributed in NYC and I made too many copies by mistake. Be interesting if he does.

My plans for this time of this day when I retired and when I awakened was to write C & G further, certified, return receipt. But I tired too much so I'll do that when I'm less tired, maybe first thing in the a.m. An old NYC lawyer friend tells me that as a practical matter I cannot do a thing until after I am hurt, when there is nothing I can do to undo that hurt. SO I'm taking a different approach, as you'll soon see. And if they are dirty enough put me in a position to do something, perhaps, when it appears.

Thanks for the fat envelope. I've gone over the clippings and I'll read the rest in old times or perhaps with some, just file it. I look forward to those letters by that Judenrat Delin!

If I were able to handle a printing I'd have reprinted WW years ago. I do not want those crooks who care about money only to have any control over the name, what goes with it, etc. They are in effect stealing that now for this supposed abridgement.

I have those Playboy interviews, thanks, so I need no copies.

I do not think that Epstein plagiarized Whitewash and without having read his book I helped the Viking publicist publicize it when we were competitors. Epstein would do nothing to help his own book. He did make a few appearances w/o any opposition. He seemed to panic when he was on a radio show and I called in. He would not have it and I did not care that much. No time for it now but his cowardize gave me a real opportunity and I was able to use it effectively, my first TV anywhere and it was in NYC. *Use him*

I do not know where Garrison got his Shaw notion. It was not from me. He took Sean Andrews from me and he began with WW. He knew about Ferrie but I was the first to use him re JFK assassination. WWII

Wrone: 1518 Blackberry Lane, Stevens Point 54481.

You are right on what you call "the True story of history." Alas!

I hope the King reprint is selling. It did not here. No word on it. I'll not be getting Groden's or Wecht's books because I'll learn nothing from them and would not take the time to read them. Livingstone's I'm doing something about, on paper at least.

He is probably manic-depressive and he certainly is paranoid as hell.

Thanks for pix, too. Best to both,

*Hard*
