

U
Dear Bill,

1/30/95

I may have enough time to respond to your 1/26 before the Simpson case telecast resumes. I'm trying to take all ~~in~~ of them in because of the startling parallels to ^{with} what was so wrong in the assassinations investigations. If I may use that word, "invidiousness."

Friday I got a letter from a prisoner in the Indiana state pen. He had heard that WHAS show. He wrote and asked for my address. Instead of writing him they sent him WW II. He wrote me at Hyattstown that long ago. The letter was actually forwarded after all that time.

I'll be enclosing ^W what is in today's mail about NEVER AGAIN!.

Georgia Powers is, as I recall, one of two Louisville women who stopped off at the Lorraine on their way to Florida. King went to their room and was there for a while. He seems not to have gone to bed the night before he was killed. Much talking with the people around him, etc.

When the FBI learned that those women had stopped off and had seen King, and of course ~~that white women had stayed at that black M motel~~, they traced them to Florida and interviewed them. They suspected what Powers writes.

Believe it or not, I've never spoken to Epstein. He refused to be on any show where he might be confronted. The first of them got me the invitation instead and it sold WW I out three times in NYC the week it was aired. He also went into a tizzy when he was on a Washington talk show and I called in. He would have left if they'd let me speak! 1966.

Your old history prof is the exception, as Wrono will tell you. Other than those you met here. Stanford does not account for that. The former head of its history dept. took a fit when the Pulitzer committee ignored the report favorable to Posner for the 1993 award! He has not responded to what I wrote him.

I've gotten another Hood student to do some retyping. A ^{out} please young woman who is ~~uninformed~~ to believe is the daughter of an American who met his mother when stationed in Japan. I gave her the first 405 chapters of what I'm adding to Senator Russell Dissents. I hope I can get back to that soon. I've written a long Epilogue to Waketh. I started reading and correcting it this morning.

I've read the story on Powers' book. I'd remembered her as white. I have no recollection of any account of her trying to get in that ambulance.

Best,
Harold
