

Dear Bill,

2/9/95

As you'll see from the enclosed I've been busy with what does not usually keep me busy and I need to return to what does,

We had it a little colder than you Monday, with a strong wind, so I skipped on^e protime this week and the fine woman next door drove me there Tuesday. We were out briefly yesterday and today.

On the UFO's, a dear friend now dead, former AP reporter, was convinced about them, had a friend who had an organization of those interested in them and Lil and I and several others saw one from here on a bright, sunny day. It was white, spindle shaped and moved as no known object could in the sky. It was almost directly east of us and it was summer time. we were sitting outside when we saw it.

You are right about what causes national disenchantment. When I could get to speak to colleges the JFK assassination was a real cause. My belief it was then next to Viet Nam ~~an~~ among the causes.

I remember the days when there was some employer-employee confidence. In many areas it did not exist but in some it was strong as it should have been. I think one of the major additional causes of that disappearing was the greed Reagan brought us and got respected. Many employers in some retail, for ~~an~~ example, followed him by putting employess on half-time. Thus they had no retirement or medical insurance, etc. , to pay and the county here had to pay their medical costs. It was quite common when I was young to know people who had had but the one employer for whom they then worked. People then often enough retired from their first job.

If I had an address rather than USA Today I might ~~xxxx~~ right King. I cannot, of course travel to his TV show.

The index of researchers is a fine idea but of the responsible ones there are too few and just making it would lead to a hassle.

Enclosures all interesting. Sending those with sociological content to Gerry, the review to Wrone.

Best,
Herold
