

Dear Bill,

3/1/95

The articles with your 2/27 do look interesting. When I stop and rest soon I'll read them. *They are. Thanks.*

You will have gathered a little about NEVER AGAIN! from what I have mailed and a little more from what I'll yet send. Full details got to be a bit much. In general, it remains a powerful work, less so than it was, and I'm concerned about how it will look if they do not correct the errors they made in added "editing" that I suspect was most eliminating in violation of our agreement. About that, as you lawyers know, an agreement is worth no more than you can make it worth. And I can do nothing about it.

I never heard of the TV program Sightings but I think you are correct in the reason Eric, who is a psychologist, went for it.

As of now we have no unusual medical appointments for April. Also as of now Lil is being referred for physical therapy. That would be no problems because we can sit and talk while they are working on her if they last into April. *Except when I use the Lyden VBE*

I do not hear from ~~the~~ Selections often but I did hear, had a call, last week. I was surprised to see that the nearby Waldens still has it on sale. *(Probably even more)* The letters and calls on Case Open are also markedly down but they were many until they tapered off.

Sorry Betsy won't be coming with you but we look forward to your coming.

I'd asked the chief of cardiovascular and transplant surgery at Hopkins for a letter to give the insurance company. He misunderstood what I asked him. His concluding sentence in his letter here today *is*,

"You should know that I think the medical profession is bewildered by your remarkable spirit. I urge you to walk as much as you can and wake those leg muscles up again."

My worry is that I can't walk nearly as well or as much as I could before last "ay's accident.

Best to you both,

*Harold*
