

6/25/94

Dear Bill,

Thanks for your 6/20 and the interesting enclosures. Dave, who is here for a short visit, also read and enjoyed them. He leaves for an AARC meeting in Washington later this morning and then will go up to Dennis McDonald's, where Gerry also will be. A reunion for him with two former students who should be the source of great satisfaction for him.

I hope your talking to the Courier's book review editor encourages him to speed it up a bit. Having so large a backlog seems a bit unreal!

On the temperature, were ~~cross~~^{crossed} the 100 line several times and have set a record for consecutive days over 90. We've been able to avoid ~~going out in~~ it for other than real needs, like ~~grocery shopping~~^{shopping}.

If we'd had a commission like that in Mexico how different all would be here! Russell was talked out of resigning.

I do not know what the Olson's hope to find. We should know soon. I believe it may be traces of other drugs. How despicable that was cannot be exaggerated. Nils did tell me they were surprised at the state of preservation of the body.

All that ~~documentation~~^{classification} is to protect the public from the truth. But it is also to protect the agencies from it.

I've been busy reading and correcting what the student has retyped of Inside and with the newest from Gallen of which I'll send you copies.

Lil got a good report on her broken wrist, with xrays that show it is doing fine. Doctor discharged her. He ~~found nothing wrong with me~~^{but accidents} in the lingering effects of the accident but he put me in physical therapy for it. First yesterday.

What may amuse and inform you is that after stupidity and ignorance from the state agency that protects consumers from home-repair ripoffs I wrote the governor. The day his office got my letter it got on the phone and that very day I got letters from the head of that commission and from the body above it. They sent an investigator who is on contract, not an employee, he turned out to be a fine ~~man~~^{man}, made a real study and I am confident will report in our favor.

Excuse the rush,

Harold
