Harold Weisberg

Dear Harold and Lil:

Sometimes I try to think of things that will make life easier for you, to make up for all the time I have pestered you with all my questions. The answer came in a flash the other day-Preinked address stamp!

You don't need an ink pad for this stamp, just take off the cover and use it. It is also adjustable.

I enclose some articles that I hope you will find interesting. The Ollie North article is great, it is nice to see the Wall Street Journal have an article I can read without having a fit. Actually, the WSJ is pretty balanced, except for the editorial page, which is apparently run by dinosaurs and right wing ones at that.

Also an article about Jim Lesar.

I have come to the conclusion that the difference between a Democrat and a Republican is about at the \$30,000 a year mark. Apparently, even union workers, after they pass this plateau, become Rush Limbaugh clones and start to figure the welfare recipients are the reason their taxes are so high. One shouldn't forget that the union workers elected Reagan, about 60% of the union work force voted for him. I was kidding a UAW member and buddy of mine telling him that he is down on Clinton even though the Ford plants in Louisville are working overtime and are more prosperous than they have been for 15 years. But Clinton gets no credit.

Say hi to Lil and I have a book order on the next page. This stamp has a 6 month warranty, so if you have any problems, let me know.

Bill

PS I have a guy searching Compuserve for Aurora articles. I have been unable to find any in Popular Science or other mags.
