

Dear Bill,

12/16/94

I hope you got more than \$37.10 for that case. And saved your client more!

I'd not known that Martha Church made the WSJ. Quite a woman. She is a geographer. She resigned after 20 years and some conflicts with some of the faculty. What she has done for that small college is fantastic. She is also on the board of the Carnegie Foundation and some others I do not recall. And a mountain climber. Her plans include returning to Nepal and visiting some native friend there, whether or not for more. But she'll ~~stay~~ sometime to live in Frederick. She got a condo here.

The clippings are useful. The review of the Dulles book made an addition to Waketh appropriate and I've a short one in rough, thanks.

As you'll see, what I finally heard from Maxwell does not tell me much.

I think it is less than he could have said.

Of course he could not say that Graff and Hall are not really for full disclosure or that with their prejudices they should not have accepted appointment.

But that he had so little little interest in the CIA's record with me is not encouraging.

I've still heard nothing from it.

Or from Herman <sup>W</sup> ref.

Hope you all have a nice holiday on you coming

visit. With all out best,
