## FINI/PUIT - MY LOUD

To tota Show from Herold Weisberg JTL assessination appeals 3/21/79
The request

The sore records I examine themore apparent it becomes that the FSI had a large operation for keeping track of public comment on the JFK assassination, particularly about books and their authors, of whom I am one. Except as they dribble out under other requests the FBI is steadfast in withholding such records. Where I have made specific requests it is joined by the GIA in stonewalling and false pretenses.

I believe that any such descetic intelligence by federal agencies on the subject of political assassinations is a separate and important historical matter.

Attached is 62-109060-7252. The last digis was eliminated in serozing. I have added it and believe it is accurate.

The last sentence in paragraph 5 is still another proof that the Lab did the taping for FELEQ. (There are indications that other means also were used.)

On the last page there is further reference to the Lab - that once again it "reviewed" a book. It was part the book by Division 6.

The recommendation includes another indication of the rele of the Surcen's om "External Affairs Division" in these matters, in this case also for a "review." As mith all of my backs and all other books, no much "reviews" have been provided.

All such records relating to so and to my books also should have been provided under my PA request. So here again there is deliberate withholding under both requests, as there also is in C.A. 75-4996 with regard to the writers listed in that request.
