

Torquin Shan from Harold Veldeberg, re our PA requests

2/22/80

Attached are copies of DIA/CSS's 2/22/80 letter to my wife, the referral to it of the FBI, apparently delayed more than three years, and my letter to Roy Bennis.

I would like to know just why the FBI never made this referral before.

In filing the FBI placed the original in its "internal security" file on me, not in the file of the person I don't know and probably never heard of. However, I would like a clear and legible copy and I am interested in the duplicate filing of the Not Recorded copy.

In filing the FBI also stamped what appears to be "SAC 5" on the record. What does this mean, Soviet Reply age by my channel?

Personally, I'm also interested in this "indirect association with representatives of foreign powers" I'm supposed to have had, supposedly leading to my firing. If that is wrongful, then how happy I should be that your Department appears to have kept secret the direct associations with intelligence representatives of a foreign power it urged upon me, friend bethink. Maybe Joe Biden took it to the grave with him.

How could a reporter ever be other than a security risk? Or one who sold food or office supplies or telephone or electric services? Maybe then even all the diplomatic people who were among my customers when I saw Mr. Keyte off the elevator with whom the State Department wanted us both photographed?

Do you suppose that Ben Franklin would understand this? How come the Founding Fathers didn't ask him?

Perhaps you can see why I wonder if this indirect association business has its origin in what the FBI withheld, my alleged association with the USSR embassy, an aspect you have not gotten around to.
