King assassination records appeals

Harold Weisberg 12/8/79

The Ray and bank robberies

the FBI investigation and report

the House assassination investigation and report

It request

In prior appeals I have claimed that all information relating to the FBI's efforts to pin bank robberies on the Rays (and as a means of explaining Jimme's financing for the year after his Nixon escape and prior to the assassination) and its lending of this concession to the ~~House~~ (to explain the FBI's own investigative failures) plus its planting the same notion with the House committee provide relevance for all records allegedly connecting the Rays with any bank robbery the FBI otherwise may have failed to solve. In addition there is relevance to my as yet unmet FOIA request coming from the inclusion of such records, also including me, in what remains of the gutted Long tickler.

The 5/11/79 enclosure with your letter of 12/4/79, which is added compliance with my John Ray request for which I thank you, adds relevance. This record is the Department's determination that with regard to these robberies "John Ray did not commit perjury in denying them before the House committee.

The very limited and incomplete disclosure in the records provided in C.A. 75-1996 leaves no real doubt of the relevance of information relating to these robberies. At least one is in the court record, one in which the names of those actually charged with the Alton robbery were excised. It is my recollection that the judge said the ~~names~~ should not be withheld but the FBI had never restored them.

The (mis) use by the House committee of course adds relevance and removes the possibility of privacy claims. (The names were not secret in any event although the FBI pretended otherwise.) In at least one case the FBI appears to have suborned perjury. It has not denied any of my sworn allegations in this regard. Protecting the Bureau may be its first law but it is not an exemption written into FOIA. Using the House committee for the same purpose also is improper. And in this regard \* call to your attention that the bank robbery records are not among those set aside in the special room for the committee's use. I have the list of those files. I suggest that this

~~means that the FBI accomplished that by instruction. (a b7e notice for which it has not yet asserted a claim that I know.)~~

If the rough and unedited draft of the memo I prepared for the DICA in rebuttal of its alleged evidence, a copy of which I provided to the Department prior to its publication by DICA, contributed to this wise decision I am gratified. There has been such too much miscarriage of justice and continuing of solutions to prevalent crimes without sound sufficient fact being added to such fires.

(children) plus two plastic, the two cutters with the blades or either provide sufficient for all records at equally convenient the days with any back recovery. The FBI otherwise may have failed to solve. In addition there is no reason to be as yet want to request entries from the location of such records, also including any, in that receives at the gated long ticklers.

The NYI/PB analogue nine years ago of 12/6/77, filed a formal complaint with no date and request for which I think you, additional to that you are the Department's authorization that with respect to those motions the FBI do not resort action to tangible them before the time condition.

The very last of you demands enclosure to the annexed provision to file. The NYI leaves no mark found of the instance of Interfering relation to these two crimes at least one to be the court record, one in which the cause of the two wholly merged and the other merely were enclosed in a my resolution letter. Please note I [REDACTED] should not be withheld but the very same matter sent over.

The sole use of the Bureau approach of course this document will prevent the possibility of privacy claims. The names were not entered in any form, although the FBI (rebuttal affidavit). In at least one case the FBI appears to have substantial problem. It has not denied any of my own allegations in this regard. Presuming the Bureau to be first as best as to not an executive version into public domain the usual condition for the use of personnel also in support and in their regard. Under the right circumstances from the basic relevant example you just said, does not make it the official move for the complainant's use. I am the last of these places I have had these files
