Col. Albert J. DeGroote Commender 1100th Air Base Wing (NAC) Yeah., D.C. 20752 Bt. 12, Frederick, Nd. 21701 6/24/77

Dear Cal. DeGreete,

DADE

As have other communications in response to my PVIA/PA requests your letter stemp dated 6/20/77 reminds me of an incident of four \$555,000 age when I was a Scante investibator and editor.

It turned out that some subpossed records had been destroyed after service of the subposse. Nobody was more indignant, it appeared, that Chrysler Corp.'s counsel, then bester Celbert. He called the name of each Chrysler official in the hearing room and asked him if he had destroyed may records. In durn each assured he had not. When this was ever and Mr. Celbert was shrugging his shoulders and appearing quite perplaned a Senator asked Ar. Celbert if he had destroyed the records. Mr. Celbert had. In due fine he rose to be a corporate president - and to preside over a business disaster.

My point is not that you personally destroyed any records. But they did exist. I've seen some. I helped generate many. If fly-boy granlins are reknowned from my time in the military I've never heard of any that ever memory-heled any official paper.

By first request under the lets I am certain produtes the settlement of the second of our suits. Therefore the destruction practices were not in force. They could not be, at least not properly, until my requests were not.

I do not have the records in my possession but I believe the final settlement was about January 1975. During that time the judge insued a discovery order against the government. Although properly copies should have been provided to me and my counsel a set was nevely displayed. I then was not able to do anything about it. I was able to examine these records. At least one large sheaf was from the Air Force. I'm protty certain these included Bolling records. Then may still be in the files of the U.A.Attorney in Baltimore. They included records from as far away as Texas that I recall.

There was bolling involvement in the helicepter evenflights and some of the semic bound. There were some rather acrimonious exchanges between an Air Force colonel and me. As I recall his name it was bounds. He was one of the Air Force efficers involved in a meeting arranged by the Secretary, DeD, at the emission in the susmer of 1962. I am sure he was a JAS.

As is not uncommon higher officers are too busy to draft all their own letters or to have personal knowledge or to confuct POIA searches. I assume this letter was drafted for you. In addition, long POIA experience has alerted me to possible semantical devices. Moreover, with some regularity - at locat once a week now - I am abtaining records from smother agency that had sworn to their non-existence to a federal judge on a number of the most place occasions.

I have no knowledge of how your files are kept, for long long your base considers any files current, where they are then shipped or anything clas of this nature. I do know that there were files. I do know that records are kept of their disposition. In some agencies card files are kept and file numbers recorded. So while it would seem that if you still had any files on your base they would be JaG files there are possibilities of other locations and means of locating any that have been moved. Your operations people should have some records. I know of a printed flight manual or guide with special directives for pilots on avoiding our location.

I would appreciate hearing from you about any record of any disposition of any files and any searches made outside of JAS where files of this nature might be expected to be or to have been.
