

Dear Jim,

6/3/76

If my FOIA/PA requests for files on me do not include NSA (I don't recall if I made this request directly or considered it was covered by the request to DOD) we must file a careful one soon. DIA, too. I identical requests to both.

I have a report from a thoroughly dependable source that there was massive covering, extending to one with whom I speak frequently by phone and I presume from that he became a subsidiary target of the mail coverage, which is an explicit coverage on me.

The files on me are extensive.

They are said to include phone taps also extensive.

Perhaps in this we have an explanation of the CIA's preference for going to court by not responding to my appeal at all and to Kelley's pretending that I never filed the request.

I would say, if it is not inappropriate, that I consider this covered by my prior requests to the Director, Central Intelligence (and it was not to CIA but to <sup>Alms</sup>) and to whichever it was, DOD or the Secretary of Defense. You have ~~many~~ copies.

I think I should write Secret Service again. Kelley wrote me that they have no files on me. I know they do, from two sources one of which is CIA. I think I wrote and told him this.

From still another source I know that the Secret Service had others covering me at a time and for a reason I'll explain, but in person. It is an absolutely crazy reason but the verbal account has support in documents I have seen.

I believe we should also make on to Rhoads and to include all Presidential and other libraries or institutions of any kind under the Archives, unless you think GSA appropriate. There is this kind of material in the LBJ library. However, I think we should make a separate FOIA/PA request of Archives because I'm sure the FBI at least fed them. Perhaps verbally, perhaps some summary of the files on me.

If you want me to files these let me know and I will. If you want to and think of others, please include them. But I think we want to files these rapidly as we can.

Best,
