A proma

Dear Jia, on virgue, purity and everence diligentain DJ 1/25/77

When you phened earlier today and mentioned this after discussing the williams status I did not believe any part of the tale. I still do not.

Allew for the hardheadedness of buraugencaies all you will. It sill does not stack.

Sincelast April in that ene office, regardless of what you have deno, I have written: the DAG, "yler; his FOIA honche Shea, more than ence; Shaheen at the lemst.

Aside from what you have done, and I'm inclined to believe you have done more than the necessary to attract their interest and attention, under eath and subject to his retaliation I have falled "yler a light and just about all the others perjurers.

This with a case in court, not just correspondence.

Dagan did tell Green that he supplies then with transcripts.

I think it is a bit much that by the time there is a call to you they have 20 or more cases of my POIA requests not responded to and know about my PA request on myself and some of what they may it turns up. Only new? Hell, aside from a voluminous correspondence I want into this under eath in court more than 4 menths ago.

New administration? Sure, but I am sure I've made a few references to this to them.

I am also confident that the correspondent works its way up. This means it begins with these who do not go automatically when administrations change. Survibal. And lo! today, after all these years, we have new names.

Also relevant is our discussion of future filings, on the phone.

You told him we'd meet with him? Fine. Only instead of in a week or two let us not it for when he says he has complied. I mean he has admitted more than 20 arears cases. Let us give him at least a day a case. We are not like them. We are telerant, understanding, maybe even human. So give the man all the time, within reason, that he mays he needs to comply with that of which he knowndy. I'd rather most with him when he can hand us what he can tell us are the everdue records. When he can bell us he has and they have exercised due diligence and in good if not the best of faith. Then we'll tick off non-compliance after the effice of the second wan in the Department has put his effort on it.

Deep he want more than 2 weeks? 3? 4? Agree, with the understanding that when we go there he has everything for us. And gives us a chit is saying it. That we'll want. If he dees not want to let it be in writing. I do notthink he'll want that any flore.

Enough time to be fair and reasonable, not that a day isn't with their past. But not enough time for them to nestle in with the new administration. The top gays will go. We have to complete this before the backs can feel secure, when they'll do the same dirty things on which they have survived. Do not underestimate the possibilities. Survival is a very strong drive.

We are not "ardi "ras types. Se as a tentative deadline let us say by Ash Wednessay. That gives these goodplaith types about a menth.

I think you want momething in writing to say that the letter your wrote the DAG none months and shalf ago reached him today. I's not experienced in either a wheelchair or crutches but on either from where youwsailed it the time for me would not have exceeded an hour.

I wish I could remember the letter with the wary bread hint of this. Oh, well, let us be patient and see what/countuates. We'll want to be able to record what is not provided and before we go there we ll want the subjects in wri ting.

By then we'll be able to smell spring. Wan't be too many for me. Best,
