

Dear Jim, Re; FBI-Personal files on me and my associates 9/26/77

Despite all the boasting that the wrongful domestic intelligence activities of the Hoover era are over it is the same FBI under Kelley wasting precious time and money in entirely improper domestic activities related to people interested in the political assassinations.

As a result of what I have learned I believe others should use FOIA/PA to obtain the files on themselves and that you should now add specific field offices to be searched on the files on you. Your request has run its time and I think you have not appealed. You should include Washington, Baltimore, Memphis, New Orleans, Cincinnati and those in whose areas you earlier spent time, where you lived, where you went to college, particularly Madison.

My source is dependable and in a position to know. I know the means of knowledge, my source's way of knowing.

The FBI has files on young people who have been associated with me. By this I mean young people I'd never met except through the assassination work and then not until long after Hoover's death.

This includes Floyd and one other I'll use to illustrate, a young woman who is the friend of daughters her age of a college professor who is a friend of mine.

This young woman happened to volunteer to do some work for me. As a result she came here from time to time in her own vehicle.

I do not know how many of those associated with Floyd in his varying lobbying efforts are included in their surveillances or files.

There is one man in particular of those we have met in these FOIA matters who I believe is sort of the Weisberg expert among them. I have reason for this belief. He is the one who came late, having been called to our meeting with the FBI of 6/30/77. If you can recall where I was with regard to the stage of the small auditorium in which they met with us, toward the left as one faced the stage, he is the one who was on the extreme right. He sat in the last seat to the right in the audience seats. He is the one who came in with those voluminous "bulky" files from the Murkin file. His name as I recall it is Keith, and I think that is his first name. He worked with John and Ralph Harp, not with the office of legal counsel agent who also was there.

Of course they have given me no indication they have such files on me. They have not yet provided the remaining personal files. I think it would be wise if you were to ask when we may expect them, saying that without some such assurances, late as they are in providing the balance, I'll have to appeal.

I'll give you more detail when I see you.

Best,
