

Re number of letters from persons incorrectly listed in ALPD list released by Dies Committee:

To check the Congressional record to get all of these would take too long, because they are scattered. The record of the Dies Committee, vol 10, contains 10 such letters (see preceding page).

Also, there are many such letters in the local papers, also scattered.

I do not have the names of the largest oil operators in Dies Congressional district, but I am informed by the CIO Maritime union office that all the large companies have holdings there, the largest being Texas Co.

Re dope fiend: I believe his name is Vest. The information came from the files of the NMU, which conducted some sort of an investigation before making the complaint to the Department of Justice.
