May 5, 1942

Mr. Louis Harap
Editor, The Jewish Survey
1125 Broadway
New York, N.Y.

Dear Mr. Harap,

Thank you for your kind letter, and for the back issues of your magazine, which I found interesting.

Whether or not I can supply you with a story for your June issue depends on when it closes. I expect to leave town Thursday late in the morning and will return for about 5 or 6 days. However, I might be able to do something while I am away.

Several things occur to me. One is a story on the current grand-jury investigations of the "vermin" press to show the following things:

The job is necessary now, with the country at war, because it wasn't done before the war. It is a good job that is being done by the D of J.

But it was the function of the Dies committee to have done this job. It received, up to the beginning of this investigation, \$385,000 for this purpose, which it spent instead, spreading diatribe, trying to break unions and union leaders (now waging a successful fight on the production front, a fight that would not have been possible had Dies succeeded), sniping at the administration and its program and allies (USSR, Great Britain, China), and failing or refusing to investigate the very persons and publications now investigated by the grand jury, even after the Dies committee had knowledge of them. First, the committee, officially, took the position that these persons and publications constituted no menace; then it whitewashed them. Several examples to be given. In this connection, several examples from the committee's record and reports, either in the text or photostats.

The committee failed to call before it a single one of the grand-jury witnesses (I have a complete list of the committee's witnesses and can compare it with the grand-jury list), and failed to investigate a single one of the publications (In connection with Social Justice Dies announced to investigate Coughlin "would necessitate a redefinition of the word 'un-American'" and Noah Mason said there was "no evidence Father Coughlin was connected with any un-American or subversive activities" - these are approximate quotes-I have them verbatim).

There are other who should be called by the D of J, for instance, Edward James Smythe, who was called before the Dies committee and failed

... The committee
... which is authentic
... which will
... whose names Dies professed to
... several
... which has asked for them
... a letter written
... he says many hearty
... things like these: "Nazism and Hitlerism is Protestantism in
... action, the highest form of Christianity.... We will strike like
... we may do so, if we
... we will destroy Judaism and Communism in America, we
... as Hitler has in the Third Germany.
... who has been a Christian since Jesus Christ...
... even if we have to use machine
... he admits he is a Nazi agent,
... except he hasn't gotten any money for it.
Also, the investigations and trials should show who the
backers, financial and otherwise, of these native nazis and their
papers are and have been (The D of J has the Social Justice list).

Congratulate the D of J and the administration (Washington report is that
FDR cracked down on Biddle, who had forced the release of various
Nazis who were arrested right after Dec. 7). This
is an international war against fascism, and these investigations
and trials are an internal front against Hitler and his American
would-be fifth column.

Another is the story of Nazi-connected cartels, as partially revealed before
the Senate Patents committee by the D of J -but only partially. The papers
have pretty much covered the facts as developed at the hearings, but I have
photostatic copies of some of the original papers, showing the patents
involved, etc. In addition (and this affects me personally, because I
wrote the story involved), last June the House Patents Committee, whose
chairman is Congressman Charles Kramer of Calif., sponsor of many Nazi-like
bills and resolutions, instead of holding hearings on the subject
of Nazi control of American production through patent and cartel arrange-
ments, appeared as "blackmailers" the writer and publisher of a series of
articles on this subject, and has since then suppressed the transcript of
the open hearings. After this, Kramer tried to get his committee to issue
a report along the same lines, but several Members refused to sign the
report, so he made a one-minute speech on the floor of the House defend-
ing the company against the proven charges and then allowed this speech,
which he subjectually "revised and extended" for two pages, to be send out
in large number under his frank. I have a copy of this reprint and the
envelope in which it was mailed.

Both of these stories have been offered other publications, which have
expressed an interest in them, and I'm offering them to you with the
understanding that these others have first call, because they'll pay
considerably more for the stories than you can. If they dont within a
few days after I return to town, then they're are yours, if you want
them.

If we make a proper arrangement, which would be possible to me, I think we could have a... which we are... have in mind, things that... to illustrations and things like that... instead of doing something... obtained... of... and his backers, whose names... who... course... that you might... that... need never... which has never been... things like these: "Nazism and Hitlerism is... the highest form of... We will strike... a few... that you can... interested in the... I'll... the spot. Thus... money for it...

In any event, thanks a lot. Also, the investigations and trials... of these native Nazis and their papers are and have been (The D of I has the Social Justice list).

Congratulations the D of I and the administration (Washington report is that... who had forced the release of various... were arrested right after Dec. 7). This... investigations... an international war against fascism, and these investigations... an internal front against Hitlerism in America...
