SAC Photo Lab

Can Jet to Site

OMAHA, Feb. 28 (AP)—The Strategic Air Command has condensed a complete photo-reconnaissance laboratory into 14 trailers which can be jet-transported anywhere in the world, the Omaha World-Herald said in a copyrighted story today.

Six of the trailers airlifted any place in the world give SAC intelligence experts a workable photographic laboratory containing the most up-to-date film-processing and viewing equipment available anywhere. All 14 working together make up a complete laboratory.

Maj. Gen. Robert N. Smith, director of SAC intelligence, said the complete laboratories could be airlifted to any trouble spot in the world, thus saving vital hours in developing and analyzing films taken by SAC reconnaissance planes.
