OBSOLVED

November 9 1980

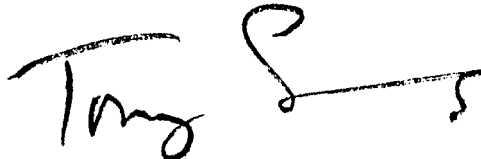

SENT WITH CHANGE

Dear Mr Lindsay-Smith,

Since we talked a week or two ago, there has been a development on the Kennedy thing. The Congressional Investigator on the "Bishop" area has published a major piece on "Bishop"/David Phillips in the "Washingtonian". ~~Phillips is apparently trying to respond to this in some way, perhaps by suing either the investigator or me.~~ According to my McGraw-Hill editor, who has been talking to sources in Washington ^{He} "Bishop" affair is likely to be the specific subject of a congressional enquiry. That aside, the Justice Department has announced that it has started a further enquiry into the scientific evidence in the Kennedy case.

I'd like to see my piece, or a judicious edit of it, published soon - and have called Trevor to say so. My thought was the anniversary, on November 22 or your nearest date to it. I hope this reminder is useful, and re-iterate that I do not wish to cross wires between myself and you and Trevor.

Yours sincerely,

Anthony Summers

Spain.
