

ADMINISTRATION  
CIVIL AERONAUTICS AUTHORITY  
WASHINGTON

May 21, 1941.

Mr. Harold Weisberg,  
313 H Street, N.W.,  
Washington, D. C.

Dear Mr. Weisberg:

I am enclosing some pictures of the Washington National Airport which will give you some idea of the progress story that can be told in pictures. For your information, there are literally thousands of pictures, many of them taken for specific purposes during construction, and one can tell almost any part of the story he wants to tell via pics. These are only samples.

Undoubtedly you will want some up to the minute pictures as well, and the airport is not in condition for these. Your own PIC photographer would probably want to get these.

The enclosed "Condensed Information" will probably give you leads on the features which you will want to cover. If you get the order for the story, come down here and sit with us and we'll get up a complete and satisfactory coverage.

Yours very truly,

  
Roscoe Wright, Director,  
Information & Statistics Service.
