Dear Harold:

I have won 5 Emmys and a Golden Mike for both journalism and entertainment; I was the film critic for Los Angeles magazine for nearly ten years, and I created, Produced, wrote, edited, and co-hosted 'Real People' which when I ran it from '79 to '81 was not only one of the best shows on TV, but became the prototype on which a lot of the psuedo-reality shows are based today.

The reason I state the above is not to pat myself on the back, but as a prelude to patting you on the back. I didn't want you to think the complime I'm about to pay you comes from someone who just fell off a turnip truck, and hopefully a sampling of my background adds a little more weight, substance and appreciation for what I am about to say.

In preparing this documentary I am trying to launch called 'Conspiracy To Kill John Kennedy: The Case Of Jim Garrison,' I have relied heavily for confirmation of facts on your books and work. That work has been monumental in its meticulousness and its meaningfulness. You and your work are national treasures, invaluable to present researchers on the Kennedy case and to future historians.

You will become to the reality of Governmental horror what Kafka was to the fiction of it.

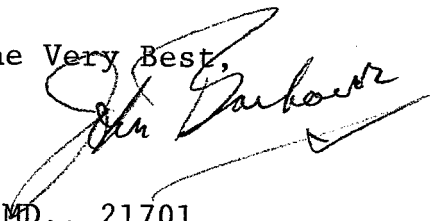

The truth is you probably know more about the assassination than the gunmen themselves, who were just hired hands!

How that event must have changed the lives of you and your wife! Perhaps even more than how it changed our National lives!

If I do get this documentary going, the first thing I would like to do is bring a camera to your house and put you on tape for as long as you can talk; and while I know you are steadfast/ⁱⁿeschewing speculation, relying solely on facts, I would like you to tell me a few of the stories you hinted at, stories you've told no one else. These tapes I will then turn back to you to be disposed of or distributed in any way you wish.

In the meantime, I am glad you and your work are here; and so is anyone else who cares about Truth.

The Very Best,

sb/JB
