

Dear Mr. Storm,

5/8/92

I appreciate the kind things you said in your 5/4 and I do not at all take offense at any disagreement over the identity of the man in the doorway in the Altgens picture. I am not a photo expert and there are photo experts who do not agree with me.

However, there are some things of which you are not aware. First of all the second Carolyn Arnold statement was written out for her to sign by the FBI. I have the handwritten copy. She corrected it by hand. So, she stands on that and all the efforts by those who have their own theories and do not give a damn about fact and with the passing of years and their persuasive arguments persuade people to remember what did not happen-Carolyn Arnold is far from the only one - does not change the fact, she did read and correct the statement she signed. Moreover, there is confirmation for Oswald being seen on the first floor very shortly after the assassination. He directed Robert MacNeil, then of NBS News, to a phone.

I now have a picture of Lovelady in the shirt his wife described and we also found him in that shirt in an over-exposed section of 8mm film exposed that day, with those very large checks.

I've read JFK:Conspiracy of Silence, and Crenshaw is a liar. He and his writer used Shaw for the misinformation they exploit on the JFK assassination. I have the Secret Service records of where LBJ was when that day and of his phone calls and it simply was not possible that he phoned Crenshaw at the time Crenshaw says. If the personal and pleasant Shaw were an expert on fact rather than unteachable theories, he'd have known from other data that Crenshaw was exaggerating and was likely lying. What you say he now confirms I printed in facsimile in 1967.

Alba gave no "testimony" and again was influenced with the passing of years to say other than ^{what} ~~tr-then~~ he had said. He had no way of knowing that Oswald had a rifle in NO.

On Carolyn Arnold and a few other things I have no confidence in the work in which you do, and add Melanson's Spy Saga to that. I do not have time to explain all of this but you'd be well advised to credit nothing in Spy Saga. I read it in ms and was horrified. People like you, concerned and wanting to learn, are the victims of those who for various reasons, from ego to money, rip the mind off while ripping off the purse.

In 1966 I examined the shirt Oswald was wearing carefully. It is consistent in pattern and defects with the one in the Altgens picture. The large checks do not appear to me to be possible in that shirt.

Thanks and best wishes,
