Dear Mr. Weisberg:

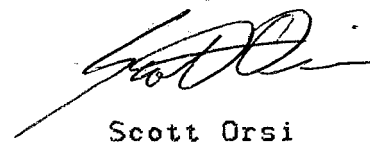

After reading your recent book "Case Open", I am writing to you to thank you for rebutting Gerald Posner's LUDICROUS book "Case Closed".

As a former business partner to the late Larry Howard of The JFK Assassination & Research Center in Dallas, I am quite familiar with the FACTS of the assassination, and was outraged at Posner's so-called facts and "new findings". I was particularly insulted at how the media was so eager to embrace this book, while continuing to look down upon any theory which involves a conspiracy (even though our own "government" came to that conclusion in '79). One particular "finding" by Posner (which obtained TV coverage on a network prime time program, NBC's NOW I believe) about the Willis girl stopping to look toward the Book Depository was most IDIOTIC. Let me see if I've got that insightful "finding" straight... Posner and the national media are ready to conclude that because a ten year old girl stops and turns around on the Zapruder film, that direction MUST be where the shots were fired from. Never mind the numerous ADULT witnesses who said they heard shots fired from the Grassy Knoll, or the multitude seen ON FILM running up that same knoll immediately after the President's car fled the scene. What evidence could that possibly be, as compared to Gerald Posner's all knowing, clever deductions??? What kind of rational thinking person could possibly believe ANYTHING Gerald Posner has to say about the case, given that one stupid deduction alone?

Well, as you and I both know, unfortunately too many people are ready to believe what they're told on the evening news, and by self-proclaimed experts like Gerald Posner. It's a shame that your work is only given it's due recognition in specific JFK assassination specials. It's a disgrace that Gerald Posner gets national attention & praise. Most importantly, it's a crime that our government has refused to give the public the TRUTH about what really happened and why. That fact alone is the most self incriminating case for conspiracy.

Thank you for carrying the torch, and I look forward to your future works.

Sincerely,

Scott Orsi
