Dear Mr. Weisberg,

Thank you for taking the time and interest to respond to my letter. The story about "Oswald" pictured in front of the TSBQ building in the Altgens photo, as well as that of his shirt and Lovelady's inability to produce same has me fascinated and baffled. It would be a real breakthrough if scientific analysis by Wisconsin Public TV could resolve this question once and for all. If this ever occurs, either through their efforts or those of other credentialed researchers, what do you think of the chances of the information becoming public- especially in view of the grossly unfair treatment you have received from the publishing industry? Toward that end, I will be very grateful if you could keep my name and address on a mailing list so that I may receive future investigative updates such as the flyer you enclosed and from which I am ordering.

Obviously, I am a great admirer of yours and have the utmost respect for your determination in using the legal system, your own investigative acumen and combining these with a wonderful writing style. I sincerely hope that your resoluteness is manifesting itself in a positive way with regard to your health.

With all best wishes,

Carolyn O'Brien
