

7/22/94

Dear Mr. Curtis,

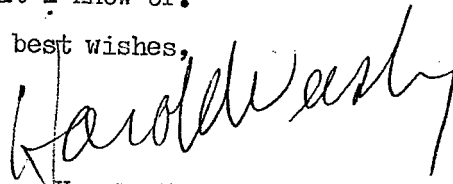

I appreciate your letter and your generous offer of help!

If you were closer I certainly could find something that could be of help because I'm 81, my health is impaired, and I am limited in what I may do.

Cyril Wecht is a friend and I believe an excellent forensic pathologist. He once headed that academy and another the name of which I've forgotten. I caught some of his appearance in the Simpson case and what he pointed out is what in general, not just about that case, people should know.

He has been aired on the JFK case on CNN that I know of.

Thanks and best wishes,

Harold Weisberg
