Mr. Weisberg Sir:

After completing another of your detailed and fine books I felt compelled to write you. I have a great deal of respect for you and your relentless courage in pursuing the truth and facts of President Kennedy's death. I will make this as short as possible for I know you must be busy with all your work. I was eleven years old when the President was murdered. I was sitting in a classroom when the teacher was called out of the room, when she returned, quite shaken, she announced the death of the President, then said the school was closing and for everyone to go straight home, this was 2 P.M. E.S.T. Since that day my interest grew in leaps and bounds to the present. Unlike your self I would say I became a student or amateur investigator of the assassination. The crux insofar as ~~was~~ conspiracy I believe lies near the beginning at Parkland Hospital. If what the Parkland doctors (specifically a Dr. Charles Crenshaw) state about the head wound or wounds is accurate then a shot from the right front is 100% fact not supposition. I respect Dr. Crenshaw for not being afraid to finally come forward, he did have a lot to loose in those early years as probably a lot did with any contradiction of the fabled Warren report. I've been watching a lot of recent documentaries, just to see this Posner character (Case Closed) taking up a lot of valuable air time. I was wondering if Gerald Ford may have hired this guy just to throw the ongoing wrench into all the hard investigative work that has

gone on by yourself and others. I think the only thing
closed with Mr. Posner is his mind. You may be wondering
why a stranger and Canadian would show such an interest
well President Kennedy touched a lot of us strangers in many
ways. A lot of people I have talked to on the subject say yes
it was tragic but the man is dead, nothing will bring him back
I realize this, what disturbs me is the perpetrators of this seem
to have gotten away with it. I believe every President since Mr.
Kennedy have been full in shortcomings and these perpetrations
of the assassination hold influence and will act again on a Presid
who doesn't play ball. I hope I'm wrong about this last
statement Its one I'd like to be wrong on. Keep up the good
work Mr. Weisburg and remember there are a lot of us out
there who support you and your work. I would greatly appreciate
hearing from you, but I will understand if I don't. Thank you
and God bless.

Yours Sincerely
Larry Papp
