Re: FBI GUNRUNNING AND THE SINISTER COINTELPRO SUCCESSOR

Hello! In the following 441 pages is some rather frightening information regarding how one man obtained information concerning illegal import/export activities (high end military weapons) of an Ex FBI Agent.

In researching the Intelligence Community, it is strikingly apparent that many other people, in not only the FBI, but of other Agencies, were well aware and possibly involved in these insubordinate activities.

The story proceeds with the battle between Mr. Stuparyk and the actions the FBI undertook to attempt to neutralize Matt Stuparyk in the most covert means possible-a target under the MODERN COINTELPRO apparatus.

My investigative abilities are limited. Hence, I would please ask for your assistance in investigating this matter. I can only say one thing here guys were going to need a very big probe to get to the bottom of this. What will be uncovered, will shock people from every corner of the globe.

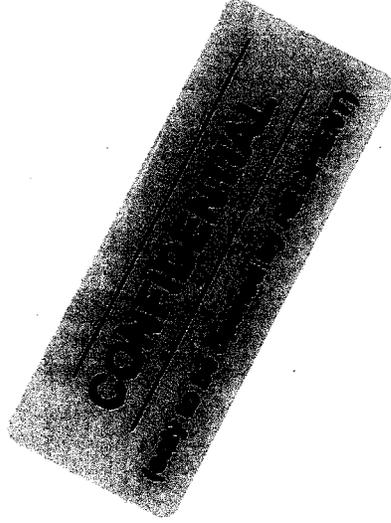

This was not, and is not a Law Enforcement Agency, and by reading the following document you will without question uncover a Fraud that has victimized the American Public for over 88 years and continues to this very day.

Furthermore, this institution and its current operability (the COINTELPRO operation it secretly runs), poses A THREAT to the very people that are the monetary source for its existence!!!!

Thank-you,

Matthew Stuparyk
