

## ECONOMIC COSTS

Economic costs incurred by taxpayers for the FBI to implement operation MODERN COINTELPRO upon an innocent MED STUDENT:

### (A) MOBILE SQUAD:

The following cost analysis is based on-

1. "Normally I like to get 5 cars on surveillance"-said Agent Torres. We will assume that only 1 person is in each car. When in actuality, their could possibly be two or three.
2. FBI agents on GS-12 wages, approximately \$68,0004.00/yr.
3. We will assume that the surveillance was initiated on December, 10, 1993. However, I most certainly believe I was on surveillance from March of 1992, but corroborating this is well beyond my means.
4. We will assume no traveling costs. Since we cannot determine from which 56 field Offices, or 400 Resident Agencies the members of the FBI's Mobile Squad came.

5 agents \* \$68,004.00 \* 2.219 yrs. = \$ 754,504.38

### (B) SOG-STRATEGIC OPERATIONS GROUP

The following cost analysis is based on-

1. We will assume the FBI's SOG, that is coordinating and implementing operation MODERN COINTELPRO is comprised of 5 members.
2. FBI agents on GS-12 wages, approximately \$68,0004.00/yr.
3. We will neglect any private sector involvement (i.e. people in the community contracted to be stationed in various establishments that the target visits on a frequent basis, so the FBI can keep their staged events as obscure as possible).
4. We assume the cost of any installed electronic equipment to be zero, since no accurate pricing can be obtained.
5. We will assume no traveling costs. Since we cannot determine from which 56 field Offices, or 400 Resident Agencies, the members of the FBI's Strategic Operations Group came.
6. The SOG duties include- bugging establishments, operating at the Bell Regional Switching Center and/or coordinating surveillance activities, Operational tactics, etc. (functional sirens at the most remote locations you visit, disabling your computer activities by writing to your windows directory with TMP FILES OR BAT FILES., routing your phone calls to addresses other than those you have requested, penetrating your various electronic equipment through your AC power supply, orchestrating arrests based on spurious charges, etc.)

5 agents \* \$68,004.00 \* 2.219 yrs = \$ 754,504.38

### (C) LEGAL RAMIFICATIONS

Matthew Stuparyk Vs. The City of Los Angeles and Matthew Stuparyk Vs. The Federal Bureau of Investigation

There is absolutely no monetary compensation on this planet that could correct or alleviate what has been inflicted upon myself or my family. But, consider these facts, as will be presented in the Court of Law:

- Matt Stuparyk spent several hundred thousand dollars (this is a minimum) in attending University to prepare himself for Medical School (travel expenses, housing, food, long distance telephone bills, tutoring, pre Med assistance programs, health costs in a foreign country, hotel costs, etc.)
- Medical School expenditures were astronomical (travel expenses to a foreign country, housing in local hotels, long distance phone bills, shipping books, equipment, and other study supplies, etc.)
- The psychological trauma Mr. Stuparyk suffered as a result of seeing several years of study end as a consequence of false allegations by the LAPD and the FBI. (emotional collapse at Scarborough Centenary Hospital immediately upon my return home from Medical School).
- My family emotionally traumatized (i.e. as a result of disbelief that the FBI would have surveillance placed on me, or be implementing very sinister, sadistic, vile, tactics, etc.)
- The resulting distress from the FBI's MODERN COINTELPRO ATTACK has resulted in my detainment in Psychiatric Wards against my will on several occasions. Being forced medications for psychopathologies I do not, or have not ever suffered from, pharmaceutical expenditures, . etc.
- The astronomical amount of money I have spent, trying to substantiate my innocence (FedEx Bills, DNA profiling charges, Graphology Charges, Polygraph charges, other Forensic expenditures, legal fees, etc.).
- Other trauma suffered from the FBI's sinister, sadistic, vile, immoral, wretched, attack, that unfortunately, cannot be measured.
- Lost wages- as I would have been fully employed as a practicing physician in the United States.
- The effect these false allegations have had on my relationships.
- Charging a Medical School Student who had in fact excelled academically and athletically, with federal crimes when there is more than substantial evidence to indicate the FBI had knowledge that I was not in the Country where these crimes occurred.
- This was a deliberate and premeditated crime, part and parcel of a highly covert operation of the FBI, that sadly has been done to numerous other people, and continues to this very day.

## LAST MINUTE OBSERVATIONS-COMPUTER PROBLEMS

As all my files were completed and waiting to be printed on March 8th, 1996 I ran into more problems that prevented the printing of any files. Then, my computer completely crashed, and would not get back to the dos prompt. So I called PC fixit on March 08th, 1996. The representative made the house call and completed all necessary repairs (new battery, restoring sys files etc.) and was paid \$433. The computer was operating fine for minutes after the repariman left. Suddenly, exe files were being deleted from directories and moved to different directories. I reinstalled all 24 diskettes that comprise MS Office, but then trying to run MS word, the msoffice.exe misteriously disappear. So, I tried to locate the msoffice.exe file on the 24 MS OFFICE DISKETTES. Then suddenly my A drive became disabled. My sys files had all been edited. I basically came to the conclusion no matter what I did the FBI would ensure that I would be disabled at my computer. Then I headed over to ComputerTime on Queen St. in Toronto. You would not believe this but the only two computers with MS office installed were being controlled remotely by the FBI, just as they had been doing to my computer. I could not save anything to a select directory and was locked into c:/msoffice/winword/template. This occurred on both computers at ComputerTime Inc. After questioning HEATHER on the mysterious problems that were identicle to the problems I was having at home, she replied, "Oh that happens all the time." I finished and my bill came to \$150.00. for using computers that gave me similiar problems to mine. Sorry for not presenting a well formatted document but at the moment my computer is totally down. I am not even going to bother trying to get it up and running, as these "psychopaths" on the controlling end of this remote device have some tactics that they must implement to fulfull operation Modern Cointelpro.

THANKS

Matt Stuparyk

FORM DC 32

EXHIBIT: 03-08-96.A

DEDUCTIONS: I was having numerous problems trying to print some of the documents that comprise the 441 page booklet. I printed one page at a time, and that seemed to avoid the error messages. Suddenly, my computer crashed and would not get back to the dos prompt let alone into windows. This happened the day before this booklet I knew it was either the battery again, or maybe the FBI agents were installing other files to my computer via the chip installed in the motherboard\*\*\*

As you can see from the above, it was the battery and numerous damaged file,

Also worth noting was the numerous TEMP files that were in various directories, especially my windows directory. The technician said, "I have never seen so many tmp files"

\*See exhibit 03-08-96.B (extensive information on the surveillance computer ship)

//  
"HOW THE FBI/CIA CAN BUG YOUR COMPUT" //

When the FBI arrested the accused "spy" Aldrich Ames, they claimed to have intercepted communications from his computer. The media have claimed that they installed a device which allowed them to intercept hypertext and remotely examine files. This is a mechanism designed to hide the TRUTH about how they watched Ames, AND HOW THEY WERE BEING WATCHED TOO.

In 1982, US President George Bush signed secret Executive Order 12116, which mandates the installation of devices to allow surveillance and interception of communications in all US-built or designed computers. This takes the form of several hardware:

All PC motherboards built in the US or from US designs have a concealed track concealed on one of the inner layers, which acts as a high-gain antenna, and can be used by other surveillance devices in the computer.

A PC also has THREE ground lines these are would be sufficient. This is used by the surveillance devices in PCs. Pin 210 is nominally a "ground" pin but connects to the antenna in the motherboard, which also acts as a common signal channel for surveillance devices. To retrieve a computer to transmit data to the FBI, all they have to do is to insert into any slot a small device which piggybacks onto the card and is practically undetectable. This can send ANY signals -- hypertext, disk data, displayed text -- to whoever is monitoring you.

Since early 1993 the CMOS devices in PCs have been modified to remove the need for the clock monitoring device. The CMOS RAM was originally a battery backed memory chip containing system information and a real time clock. This is completely connected to a battery, so it is operating ALL THE TIME. The new CMOS devices (which use the same type number as the old one) also monitor the antenna. If it receives a pulse of a particular tripping frequency it will log all hypertext and disk accessed and transmit them in bursts to any monitoring unit within 200 meters.

DISTRIBUTE THIS IMPORTANT INFORMATION FREELY. MAKE 50 COPIES.  
To find out more about the man service, send mail to help@man.pnnet.ca. Due to the double-blind, my mail replies to this message will be anonymous, and no response at all will be allocated automatically. You have been warned. Please report any problems, inappropriate use etc. to admin@man.pnnet.ca.

EXHIBIT: 03-08-96.B

DEDUCTIONS: I retrieved this off the CRS Online VERONICA NS. When I queried the database for the keyword-"FBI". This document was on the screen so I printed it. However, the text is extremely small as it was on the screen I have never come across this ever while retrieving information on the Internet.

I did discuss this with some computer consultants and they were very surprised, but said it seems logical. Also, they asked for copies. I guess they must have found it very interesting.

I would also just like to say one more thing. Just prior to finding this on the Internet (in early 95) I was looking in bookstores for information regarding computer surveillance.

But, this as I theorize, just another episode staged by the FBI to inform you as to the extensive methods they use to watch you. "THE ELECTRONIC DRAGNET".

Furthermore, this does explain the numerous internal batteries I have had to purchase. Unfortunately it doesn't explain how the FBI OBTAINS WRITE AND EXECUTE ACCESS TO YOUR COMPUTER.
