

Dear Jerry,

8/23/96

If I knew which of those 22 wires you might be playing with perhaps I might help a bit more. Even keep you from burning yourself.

What you say about the new people in the JFK archive not being able to locate what would be those who were there when I worked in it is not really a surprise. I've tried to warn the ARRB people that this switch to computerization as it is being done with present such problems, especially to those of us who worked in those records before computers.

However, my recollection was correct. The transcript(s) you want are with all of them and they are all paged. I enclose what I had in a file in my office (I can't safely go to the basement to get the transcript to copy for you and there may be more than the transcript there, I do not remember) on this nutty psychiatric examination that was limited to what the Commission fed its experts. I had an occasion many years ago to send that first page and what is between the other two pages to a high school lad, very bright, who as of my last knowledge managed four or more division on the Lucas film empire. The other pages I've not read. I just copied them for you in the extent they can be of use. The printed pages you can keep. I've two of them. ~~The~~ Journal of Forensic Science.

Not having read those two pages I did not notice they are the same. Both in the event you want to send them one.

There may have been other discussion of that silliness than the pages of which I made copies but the transcript you want begins on Ward & Paul page 7826 and the names you asked for are at the bottom of that page.

If you make any use of that phony shrinkery you will hurt your reputation. As an example of what those nuts did not "evaluate" look at Whitewash beginning about page 120 on the actuality of his politics. They were trying to phony up a phony case and in the end abandoned it. *without that and more like it.*

Best to Walter and his family. Never met yours.

*Harold*

8/21/96

Harold: I still am getting nowhere with the JFK-assassination people at the Ntl. Archives. I wrote to the woman you suggested. The claim is that there was no session with the three criminal Psychiatrists -- yet you and I both know that a session was held, I believe in July, 1964. One informed the WC investigators that Oswald must have been thinking of his mother and his estrangedpouse when he pulled the trigger. Have you another suggestion as to how I can get those three names?

Jerome Agel
