

Dear Mr. ...,

8/20/79

Reur 8/15: Thanks fo r the Becker cite. Hartnett sent me a photocopy of those pages and I've read them. Also agree with you. My copy of Green & Eli's "Jungle is gone, probably not returned by L. Tolson. Don't have it yet. If you see any other relevant stuff please let me know because - have neither time nor desire to put in emotional hip boots and wade through the sewers. However, I think that may be the next big disinformational line and want to be prepared for it to the degree possible.

On agenda: when I suggest to Shaw that his people can consult you I'll carbon you.

I don't know what explains the FBI's Shaw's records. But the reference to the 1964 case is in a 1967 one, or they were looking into him at the time of the WC but did not tell it, which is what they told Clark, who in Hymer's words blabbed. As of 1967 the first law was the usual law, cover the Bureau's ass. From the obliterated reference I believe there was no ref. to Feinie and I would not expect that Shaw would associate with a Pende. I thought I sent that to you - all I saw.

I'm not checking further than the 3rd-man note (thanks) on 90: the men in the WDCU film are Shana and Alice and not this associate of whom I heard from both Core and Steele. Nor is there any indication that there were two with him at the time of the killing, only one other. If I did not send you these records it will be easier to get them from Gary "Ack or Earl Goiz, to whom I sent them, either or both, for a story Earl is working on. I've loaned him the Dyle film and referred him to Schoenau for Martin, which he has. But with that kind of lenowness with fact it is understandable that the committee had no real interest in finding that person. What I think you'd be wise to understand is that they came up with the conspiracy angle only because their's putdown of all putdowns kicked back. So then, regardless of what you've been told, they worked hard to avoid any possibility of coming up with anything.

No restriction on the Shaw or 3d-men records but I hope people don't do wild with Shaw in particular.

I think I'd heard before that Bradlee killed that Pearson 3/3/67 column and I can see a logical journalistic reason for it. But is there more, other reason?

On your C/I list I'd appximate 1,2,3.

I've read the citations to 321f1 and 103f and find their treatment of the Army Intelligence and its destroyed records entirely inadequate. I learned easily what they omit and they omit all ref. to Powell and those ~~remaining~~ records.

The were three Army JFK files Army intel. destroyed plus all the records of that 112th group, except for a few at Indiantown Gap, which the committee could have gotten. So it wasn't just name files. I gave 'em what they used hoping it would suffice re c/but.

I don't know that it means anything but I can't imagine a clerk stupid enough to destroy records relating to the assassination of a President on her own.

I'd not be surprised if at some future date a duplicate microfilm surfaces.

Sincerely,
