Dear Robert,

Thanks for the Bugliosi interview. He may write a book and it may sell, but it will be a crappy apology for the official mythology and he'll not only not base it on the alleged thousands of documents, he won't even have them. He may, with the slick talk of slick lawyers, be referring to the documents published by the Commission and by HSCA. He doesn't know enough to know where to start in getting any not published and I doubt very much he'd take the time. I don't know who he knows who could help him and of those I know he knows who disagree with him, they know very little and have most things twisted - Turner and Christian. Don't worry about it because there is nothing we can do about it.

I knew about the Sahl special and we looked at the Orioles game instead. Mort is nuts and no less so since he turned so far right.

I've read Garrison's book and it stinks. Don't take his word for anything in it and of the things - was involved in he straight-out lies. Too bad because he is a gifted, articulate man.

I've not gotten the frames of the Zapruder film because the one I'd been told would pay the costs hasn't. I've got the right to have the frames but that is all and I can't pay what the archives will charge per frame.

I had promises but the promises were not kept.

They won't stop the motion on the original even if they would project it so I can't examine those frames carefully and what I'm most anxious to see can't be seen on projection. It is what is between the sprocket holes.

Does the new address mean you have a house of your own?

We are OK. Hope you are too.

Best,

Dear Harold -

Hope you are well. I've been meaning to send this to you since August. It's an article on Vincent Bugliosi who seems to be as obsessed with Oswald being guilty as David Belin. Odd, considering Bugliosi was pro-conspiracy in the RFK assassination.

I recently read Jim Garrison's new book and saw an interesting PBS documentary on Mort Sahl where he talks about the assassination, the effect on his career and the secret CIA government of the U.S. If they run it in your area you should take a look. Did you ever get a look at those frames from the Zapender film that you sued to see?

Take care.

Best
Robert
