Dear Robert, 4/9/78

Thanks for the great batch of clippings. However, please try to be careful with them. Some were incomplete, others lacked date and source. Both reduce their value, in the present and for others in the future.

Epsteink: for all practical purposes Legend is a spook "black book."

Kershaw: Ray fired him, hired Mark Lane.

Eddowes: complete waste of time and money, as are all the theroists.

Marina Oswald/Priscilla McMillan: as long as people are in general accord with the official mythology they get air time and it is an easy time for them.

This goes for the two docudramas. Without it they not have been made or aired. Also neither was any good at all.

New books: too busy in FOIA court cases. I have what has been released and am fighting for more that has not yet been released. There are odds and ends of worthwhile things but don't forget, with the crime never really investigated there is little chance of finding any smoking guns.

Thanks for your good wishes about my health. It has not improved. But I do stay busy and try to keep the unessential to a minimum.

Hope you thrive in your writing.

Thanks and best wishes,

April 6th 1978

Dear Mr Weisberg,

I know it's been some time since I've written to you but being a writer (as you are) I'm sure you understand. I too am a writer and writing takes up a great deal of my time as does trying to interest people in what I write. However, I haven't forgotten you (far from it) and enclosed here there are quite a few articles of interest.

There are things from all the major periodicals as well as newspapers. Some junk (and I do mean junk) from YIPSTER TIMES is also here. Excerpts from the Edward Epstein book which appeared in New York Magazine are included (did you read his book? If so - what did you think?). I also have sent Ray's interviews with Playboy (where they gave him a lie detector test and he failed) and some accounts of his escape from TIME and NEWSWEEK. Is Jack Kershaw his lawyer now? Anything new on his case (Ray's)? There's a review of a book from a Chicago paper. The book is called THE OSWALD FILE by Michael Eddowes. I have not seen it yet but it received a decent review. Do you know anything about it?

I have seen Marina Oswald on various talk shows (DICK CAVETT and TOM SNYDER). Neither host got anything of interest out of her or the "so called reporter" who co-wrote the book with

her. She did claim Oswald was going to kill Nixon – I hadn't heard that one yet. I was surprised that Cavett didn't challenge her a bit more – but she's a hard person to interview because her English is still not too good – . also Priscilla Johnson was always there butting in as if she was married to Lee not Marina.

I don't know if you caught either ABC's TRIAL OF LEE HARVEY OSWALD or CBS's RUBY AND OSWALD – but if not you didn't miss anything. The Trial was done by our friend "the scavenger" – Lawrence Schiller (sort of the Chuck Barris of journalism). It was absurd and ridiculous. The CBS "docudrama" was boring and totally ignored even the proven facts.

Are you working any books now? I wanted to ask you if you have looked at any of the newly released evidence that was so quickly dismissed by the press as having no new leads. If you have looked at, are there any new pieces of evidence there?

(3)

I have enclosed some other odds + ends such as Larry Flynt's ad in the New York Times for information on the JFK assassination. Also I've enclosed a magazine that I found on newsstands devoted to JFK's Killing.

That's about it for now. I hope that you are well and I hope these articles are of some use to you.

Take care.

Sincerely,

Robert Bruce
