mined to match its achievement on the natural gas side of its first explanation seems business."

Not only have the oil companies indulged in "false reporting of the success of offshore drilling" in order to boost rates, suggests the report, but the Federal Power Commission has "done its best to appease the producers" at the expense of the consumers.

The FPC, which fixes the rates consumers pay for natural gas, is supposed to protect them from profiteering. But President Nixon installed as chairman a reluctant regulator named John Nassikas, who has helped the oil companies increase their gas profits. We proved this in 1971 from documents Nassikas had kept under lock and key.

been going on in Louisiana's fabulously rich offshore gas fields:

In 1973, it plummeted all the In a secret report to Chairman way down to 1 per cent although

"Either the oil industry has tremely unlikely.

"The less success the industry shows in its exploration, the higher the price it can demand for its gas," the report points out. Once the price is set, new developmental wells may produce "prolific quantities" in the same areas where exploratory wells "reportedly found nothing.
