

2/31/68

Dear S.,

Forget to remind you of my old request for a complete file of the Innovator for the time Kerry Thornley was one of its editors. You have all of this in writing. If you have the time, I'd appreciate it. Not only do I want a complete file and as complete as possible a picture of Kerry, but I'll be making a phoned broadcast to his city very soon. There might be something in it that I might use that he might read to. I think some of the past reactions will be very helpful in the end.

I wrote the men in the ADL to whom I had spoken telling him that you would be in touch with his local man at my request to see whether any help was possible. He sent me what he promised to.

Hal was due back in SF today. Gary returned to Minneapolis also today. He has the same box at school but is changing his home address. His bad eye hemorrhaged last week while he was in Ithica. His trip there was a fiasco, for he also got some kind of virus and got nothing done. The possibility of a detached retina from this kind of eye problem is high, and that means surgery and a glass one. This is the eye in which he lost the sight after the beating. Too bad always, but particularly with him because he is a great guy.

The very disturbing convention was not conducive to writing.

Anything new on the Thornley*Litton front? Heard Dave is doing a piece for Atlantic Monthly.

Liebeler seems to have been very quiet for him. Has he been or is it that I've just not heard otherwise?

Best,
