To Prospective Member of CTKA:

As you can see from the package we have assembled, "Citizens For Truth About the Kennedy Assassination" is serious about doing something about the three major political assassinations of the 1960's: John F. Kennedy, Robert F. Kennedy and Martin Luther King.

Considering the initial responses to our group's formation, we, as well as many others, feel that the time for discussion is over and the time to take action is now! Fortunately, the election of the Clinton/Gore ticket and the appointment of the JFK review board creates an opportunity that none of us can afford to let pass by.

CTKA is not another research group. And our newsletter, "PROBE," is not just another collection of research articles and book reviews. Our group is a grass-roots political movement and our newsletter is a monthly report of what is currently happening in these cases. We plan to accomplish two major goals: the re-opening of the JFK case through the review board and the expansion of the scope of this review board to encompass both the RFK and MLK cases as well.

To accomplish these goals we first had to form an umbrella group under which others—both within the research community and in progressive groups outside of it—could work towards a common purpose. So CTKA was born.

We need YOU to contribute what you can. Fill out the accompanying forms so we can call on you for your support and your input. Together we can make a difference. This movement has to be broad-based, and nationwide if it is to be taken seriously by both the politicians and the media.

Some of the tactics we will use to implement these goals are: The organizing of a CTKA speakers' bureau; the setting up of a BBS (computer bulletin board); lending assistance to all major JFK conferences in obtaining maximum "positive" media exposure; the establishment of both regional offices and local affiliates; and the coordinating of lobbying efforts centered on Washington DC.

We can't do this without your help. We are at a critical stage of our development and need as many volunteers, activist and donors as possible. We owe it to our country, but most of all to ourselves, to try—perhaps for the final time—to recapture what was taken from us.

James DiEugenio
CTKA Chairman
