This is a copy of the Colby Report I've received from the CIA. I'm sending it in the thought you may want to skin erared it, either or both of you. There is no rush on returning it.

I've read part only and won't have time for it for a while. I simply must do all possible to get the add to Post Mortem done and then get onto the appendix do it can come out. I'm having too many things I can't get to and too many I'm having the let slide...

Chiggers are being somewhat helpful. They are getting me up at night so I'm getting 4 a.m. starts.

I glanced at this last night. It is obviously incomplete but has a number of interesting indications.

One is the amount of activity immediately before the WG break-in.

Another is the indication, as I take it, of s second Operation Chaos.

Still another is Ober's role, early on.

One of the major deceptions is the pretense that all domestic activity was limited to Operation Chaos. A major omission is any of its papers prior to 6/72.

I doubt this kind of skimpy thing would have been given to a President without an understanding that there would be no kickback. Too dangerous to omit so much and may so little.

I am intending to suggest that the cover-up Rockefeller sport had this earlier start with the cover-up intent explicit from this earlier version.

As there was more leaking, more exposures, there were more areas of CIA improprieties that had to be addressed.

Ford had to be witting. Why he was willing is another matter.
