INVESTIGATION MADE BY <b>SA Roger C. Warner</b>		was not killed by the wounds on his

**SYNOPSIS**

Diagram of wounds suffered by Governor Connally at time of assassination of President Kennedy forwarded herewith.

DETAILS OF INVESTIGATION

On 1-27-64 Inspector T. J. Kelley requested a diagram relative to the entrance and exit wounds suffered by Gov. Connally after being shot by Lee Harvey Oswald on 11-22-63.

On 1-28-64 this information was transmitted to Inspector Kelley with five diagrams attached. Reference is further made to a memorandum to Inspector Thomas J. Kelley from David W. Belin, dated Feb. 12, 1964, relative to the wounds suffered by Gov. Connally. This memorandum points out a conflict in the wounds as shown on diagram #1 with the description of the wound according to a typewritten report of Dr. Charles Gregory dated Nov. 22, 1963, and requesting a review be made of this matter and a subsequent report submitted.

Other Investigations

Review of this matter with Dr. Charles Gregory indicates that body diagram #1 and diagram #5 are in error. Diagram #3 is correct, all in respect to the position of the wounds in the wrist of Gov. Connally.

Attached herewith is amended body diagram #6, which indicates the correct position of the wounds suffered by Gov. Connally to his right wrist. Also attached is amended diagram #7, showing the approximate position of Gov. Connally at the time he was wounded.

Also in error, and amended in this report, is the description of the

DISTRIBUTION  Chief ✓  Dallas	COPIES  Orig. & 1 cc  2 cc's	REPORT MADE BY <i>Roger C. Warner</i> SPECIAL AGENT	DATE 2-14-64

February 13, 1964

position of Gov. Connally at the time he was wounded. This report should be as follows: The projectile entered Gov. Connally's back slightly to the right of his shoulder blade at the fifth rib, then coursed along the fifth rib, shattering approximately five inches of the rib. The projectile then exited the front of the chest in the area of the fifth rib and entered the top of his right wrist, then exited the under side of the right wrist and penetrated the left thigh.

In view of the fact that Gov. Connally was not killed by the wounds he suffered on November 22, 1963, the exact location of the wounds on his body were not measured. The wounds as marked on diagrams are approximations made by the physicians who tended these wounds. At the present time there is no way to place the wounds exactly without the measurement of the actual wounds on Gov. Connally's body.

**ATTACHMENTS:**

- Chief - Photostats diagram #1 and #2, position of Gov. Connally's wounds.
- Photostats diagram #3 and #4, rough drafts utilized by doctors in determining position of wounds.
- Photostat diagram #5, sketch indicating position of Gov. Connally when wounded.
- Diagram #6, amended diagram indicating position of Gov. Connally's wounds.
- Diagram #7, amended diagram indicating position of Gov. Connally when wounded.

by Governor Connally on the right wrist. The wound of entry on the dorsal aspect of the right wrist over the junction of the distal fourth of the radius and ulna was approximately two and one-half inches in length and rather oblique with the long axis with some considerable curvature at the margins of it. The wound entered on the volar surface of the wrist about 1/2 inch above the flexion crease of the wrist and in the

RCW:VS

Revised (1964) report of the document contains the following information: The wound of entry on the dorsal aspect of the right wrist over the junction of the distal fourth of the radius and ulna was approximately two and one-half inches in length and rather oblique with the long axis with some considerable curvature at the margins of it. The wound entered on the volar surface of the wrist about 1/2 inch above the flexion crease of the wrist and in the

The reconstruction is made of the position of the Governor when he was struck is diagram number 4, this being showing in which it appears that the shooting is made to conform to diagram number 1 with the entry wound on the underside of the wrist rather than diagram number 2.
