Dear Mark,

The enclosed A4 story in our local papers interested me because the fired medical examiner was so important in Posner's book on Mengele. I had a high opinion of that book when I read it but as I learned more about Posner I developed questions. He had agreed to sue the German government for some of Mengele's survivors but he dropped the suit when he had enough for a book and he has given at least four different reasons for abandoning those people not one of which sticks. I also wondered in reading that book why he went out of his way so often to make so many attacks on Simon Wiesenthal. So, if you hear or learn anything about the Haseli firing, I'm interested. Not for writing. Just to know. About 20-25% of my Posner book has been printed. When I get copies I'll send you one.

Since we were last in touch I've learned of more thefts that only Waybright could have pulled off and at the least some are of great interest to Lifton only, meaning for him to have the only copies. Fits his coming book perfectly.

I've heard nothing from or about Harry or his book after the first few indignant letters complaining about him and it. In an interview of about a year ago he said he would print himself what C & G cut from his killing the truth. I'm curious if you have any news.

I hope the book you said you'd write is coming along well and that it gets a home.

Sincerely,
