Request for location and examination of mark on curbing at assassination site

Curbs - Minor disturbance at L to edge  
If lead - containing present it could  
have originated from the core portion of a metal  
jacketed bullet - such as C1, 2, 3, a automobile  
wheel balancing weight or some other source  
of lead. The absence of copper-alloy bullet jacket  
residues precludes the possibility that the mark was  
made by an unjacketed bullet. Further, the damage to the curbing  
would have been much more extensive if a rifle  
bullet struck the curb without penetrating it.
