Dear Fr. David.

Thanks for the pages from David Fisher's Hard Evidence, of which I'd not heard. I've highlighted them in the event of future reference but believe that at best it is worthless and much of it is absolutely, will tout question, galse and was known to be false by those quoted FBI agents. There is not a relevant word from them that would stand up under court examination. Not even on their shooting. What razier is quoted as saying is refuted by what he swore to. And as you'll see to a limited degree in Post Hortom and in greater detail in NEVER AGAIN! the best shots the HRA could provide, under improved conditions and with the rifle overhauled, could not duplicate the shooting attributed to "swald. Frazier did testify that one time, firing from the prone position with the rifle overhauled and after practising with the defective sight, at 25 feet he got one shot off in 2.3 seconds. That means from the time of the short and does not include sighting, effic.

There is no question about itat mall, and Frazier admitted to knowing it when we deposed him undereath, the damages to the shirt collar and the was not from any bullet. That was impossible, despite what Fisher quotes from them. It was from a scalpel.

The stuff on Oswald's printed dishonest. He worked in those boxes that very morning so they had to be fresh. Bit not one was where he'd have touched a box to move it. Onlift it.

It is a lie to say that found the fragments from the head shot. The prosector testified that the X-rays show 40 dust-like fragments there. That bullet exploded. With abig shunk remaining at the back of the head. What they found the presumed was two fairly large size fragments they assume was from that shot but there is no evidence that it was and there was oppositionity to plant, them and more. The actual evidence is that "small could not have fired that rifle that day. I mean the actual and lied-about official evidence.

Theu also lie about the marginal maturial in the Zapruder film, as you'all find in Whitewash II, which dates to 1966.

What is interesting, and I'II be sending copies of this to some professors who eight FOIA requests or get students to do that, is what was withheld from me in lausuits in which it should have been given to me. One page 264 Robert Fris "razier is quoted as saying that "cover required him to read and annotate the earlier books. They with held wal."

Thanks and bost wishes,
Harold Weisberg AceleMeer

Mr. Weisberg,

I have included all relevant material from a recent book, <u>Hard Evidence</u> by David Fisher concerning the John F. Kennedy assassination. This is not especially noteworthy since information was obtained from interviewing FBI lab techs.

Hope this letter finds you in good health and spirits.

Charles Davis

## - NUMBER ONE WITH A BULLET -

of time it took to fire three shots—they developed a big TV program on that basis—but if they want to do that they will, regardless of what I say."

"I don't mean to be insulting to people," Cunningham added, "but these people are not taking the facts into account, because if their story isn't sensational, it doesn't sell books."

Neither man has seen JFK, director Oliver Stone's movie based on numerous conspiracy theories. And the investigators have read very few of the dozens of books on the subject. "I had to read the first few," Frazier admits, "because Mr. Hoover said, 'Read these books and tell me whether they're right or wrong. Go through it and write in the margins." So I wrote a memo saying, 'He's wrong here, he's wrong here, he's wrong here,' and then I forgot about it. That's the way we handled the controversy."

And finally, when asked the seemingly obvious question—"Was this the greatest case of your career?"—Frazier smiled and said, "When you're dealing with firearms cases, you get a case of a lifetime every week."
