Description:

Notes re interview with Capt. James C. Bowles, Dallas PD.

Dictaphone

A2TC Mod 5

30 min belt -

±15db 300/2500 hertz

Gray Audograph

[redacted]

Phone line capability

200/2800 hertz. ±10%

due to line peculiarity

"Voice grade" circuits

Microphones for - speaking

less on low (300/3000)

No + directional in '62

Noise canceling (not fully

We used carbon mike like [redacted]

& dynamic mikes. They are

close speaking mikes so they

would give best reception to

voice modulation with 1-2"

mike.

Freq Response

200/3000 Radio Hy-Tone

8/27/81
8:30 –
1:01

Jim E.

Jim –

J.C. [illegible] — Supervisor
1956 – 1966

Make a model spec [illegible] not

available in [illegible]

a preliminary model

90% probability it was a

Motorola — G.E. poss. & RCA

Sold in the common market but did basis same specs.

certain spec had to be met

noise cancelling [illegible]

[illegible]

mike

1 - 2 inches away from the mike

Dictaphone A 2TC Mod 5

Ch. 1. Belt

Chan 2 Disc

Chan 1 - [illegible]

voice quality only - no fidelity requirements

when received at mike
main transmitter
main antenna - Fair Park
master sound activated relay
remote repeaters - Jefferson Tower
Office Bldg. #200 block of W. Jefferson
Stoneleigh Hotel
Southland Center 2

2 (receiver) Telephone Co. land line from
(receiver) transmitter to main transmitter

dispatcher

transmitter - probably motorola

transmission from the vehicle
house goes to main repeater by
landline —

console — to transmitter unit at
(dispatcher)
main number
subscriber

100 - 150 ft
30 - 35 ft

telephone line - split when it came to HQ Telephone went one to the recorders + one to dispatcher (speakers)

motorcycle going 4-5 mi per hr. -

Doppler effect

McClain -

Dictabelt -

Ch. 1 - 12:00 - 1:55

Ch. 2 - Gray - 12:37 - 1:33 P

should take both together

27 - 30 mi per hour

3 wheel officer - Ch. 1 only heard - Trad. Mont - borrowed motorcycle - tired - embarrassed about it -

1st exposure — 11/22/63 —
March of 1964 FBI tried to transcribe —
~~transc~~ made tapes for the FBI
he has made the transcripts —

FBI played with the belts trying to transcribe them

bracketed the period on the blank —

first copy would have been real to reel

used them for many combed hours
played them on dictaphone machine
made transcript from belt

made no effort to write down the number of the belt

report deals strictly w/ communications —

wanted to help any way he could
knows what he is telling is the truth

~~metro~~ Hetrodyne — two transmission collide & makes an sound

thinks they are dimples on the belt that caused the peaks

as close as anyone to the ~~[illegible]~~

procedure expert he is the best evidence

they found impulse patterns

his research started sometime in spring 1978

commission determination be factually disproved.

Back Sep. 8 —

J.C. Bowlby III w/ Joe Ellis Gray

[redacted] –

Motorola – in Miss.
HQ – Beloxi
used to be a radio
technician w/ DL PD

records not kept on
to the exchange of
certain equipment
at a certain time

almost all of the
motorcycle equipment
was Motorola

three wheeler motorcycles
used the same type
of radio equipment as the
automobiles – individual
mike like a two-
wheeler

frequency – 45. mega
cycles

repeaters – signal
went to one of
repeaters – then from
a landline transmitter
to main tower

no direct car to
car capability

had a two frequency
system – one to
transmit and one
to receive.

Capt. thinks the
1st generation reel to
reel copy – went to
the Bureau
he has a 2nd gen
of the reel to reel at
home.

Justice of liberty
bell – patriotic group –
you think – surprised
that someone hit the bell

Sound-activated
Ch.1 – Belt
Ch.2 – Disc.

Gray was wearing
pretty well – the wire
gear was pretty much
worn.

4 second delay for
the last transmission
that activated the
equipment
integrated into
piece of equipment
the sound-noise

this was on Ch 1 –
the primary channel
for PD operations

Ch.2 – was free
assigned to
for the

[redacted] was in three wheeler [redacted]

had no steady-lit transmit light.

feels that the equipment was heavily cannibalized.

spec level was the same over a period of time.

200/3000 VOICE quality

[redacted] 7C - Dispatcher on ch. 1

Ch. 2 - was probably a one frequency channel - stand-by channel

Virtually continuous

12:30:55 Approx time of the 1st shot on ch. 1 time

The on-off switch - some wired hot - some not - radio on three wheeler probably was not hot wired - one explanation why the motorcycle was running.

[redacted] 7C, 7D

WRR transmitter communications 670-8747
