FROM: Andy Purdy
DATE: February 7, 1977
RE: Ballistics Testing, Edgewood Arsenal--Dr. Joseph R. Dolce

JOSEPH R.
DOLCE

I spoke with Dr. Dolce about information he may have about the nature of the wounds of Kennedy and Connally. He indicated that he has the original "write-up" of the ballistics testing (55 pages including photographs) and that there are significant discrepancies between the conclusions of the original write-up and the conclusions which were later given to the Warren Commission by the people he worked with.

Dr. Dolce would like to meet with us to relate the information he has and give us access to the write-up. Dr. Dolce would like a written indication of our interest.
