

These are records from DJ (Criminal) 129-11, the earlier sections, which are all I've received to date, dealing with evidence and its preservation and of possible use in the demand on 75-226.

They may be pertinent to the indirect and unsworn representation that the single ~~xxx~~ curbstone spectro plate was destroyed to save space, allegedly in one of the alleged periodic housecleanings.

Contrary to Gallagher's incredible testimony, that Q8 or the unfired cartridge was of transcendental historical importance and this not to have any samples removed for testing, ~~xxxx~~ it appears not to have been included in the list of important physical evidence.

I suggest that you start a file for discovery and include all records of all destructions of evidence and records and all regulations pertaining to preservation and destruction and all authorizations, if any, and refusals, if any, for any destruction of any JFK assassination evidence and/or records.
