DIRECTOR, FBI (62-109060)

1/12/71

SAC, BALTI (29-30) - RUC -

ASSAULT.....LO.: OF PRESIDENT JOHN FITYGERALD KELLEDY Pulice, Texas November 22, 1963 MISCELLANEOUS - INFORMATION CONCERNING 00: Dallas

JUN 8/168 800

RE: Bureau airtel to Baltimore dated 12/10/70.

Enclosed for the Burcau are three bullets in containers lettered A, B, and C and a photostatic copy of a portion of a plat made by a Dallas Surveyor.

Fr. Stroom torrawing, Route 8, Frederick, Md., made available the energines for the tever study or eveningtion the PBI may wish to echiact in the event they may be of value in investigation of eastioned matter. Fr. W. 187113 requested that if the enclosed bullsts are not of any value either evidentiary or otherwice t. . they be returned to him so he may return them to the original source, whom he declined to identify. He said, hemover, that if the FBI should desire to keep these bullets that they make photographs of them and furnish him a copy for himself and the original source in this matter.

He described the bullets as follows:

Bullet in container labeled C is similar to the bullet which allegedly killed President KERREDY and is described as a 6.5 Mannlicher - Carcanno.

The bullet labeled A is one which was found in a planter west of the north reflecting pool in Dealey Flaza, Dallas, Texas on October 4, 1970 in the morning. L'eation of the planter is shown on enclosed plat and is described as the southern rost planter and the bullet was located in the south western quadret of the planter.

Bullet labeled B is a comparison bullet which is the same type bullet as the bullet labeled A and is the type described as a .30 caliber 1-2 type.

A friend of Mr. AMIGNAMY who is familiar with different types of fireness advised him that the bullet labeled A which contains four grooves in a right talat was possibly fired from a Russian Redel 1940 Tekerav Rifle. The original course of enclosed bulletin labeled A is, according to Er. a. 1832A. is not a lederal Covernment deployee although he is employed by a Government Agency and if it becomes absolutely necessary, Pr. Malsona will furnish his name provided the original nource gives him permission to do so. This original source, the individual who found the bullet in Dealey Plaza, adviced Mr. welsses that he weighed the bullet on a Lyman Chaus Forder Measuring Scale and 1t weighed between 149.7 and 149.8 grains. The bullet labeled B weighed exactly 152 grams on the same scale. Mr. WEISBERG source performed no chemical tests on any of the enclosures, but he did note that the nose of the bullet labeled A does contain a small "nick".

Mr. WEISBERG and his source believed that the bullet found in the planter at Dealey Plaza is a recent "plant" otherwise it certainly would have been found before this. He, WHISBERG, believes that there is no possibility that this bullet, labeled A, could have been fired from either the Texas Book Depository or the "grassy knoll", which was also mentioned as a possible point from which the shots which killed Fresident KENNEDY were fired, and still land at the location where a source found same.

The planter in which the bullet labeled A was located was there on the day of the assassination as shown on the enclosed plat which, pencell, to he, will Bing, was made in either recember, i.e. or april, 1964, He said that, regarding the enclosed plat, everything over and above the plane survey was later added by RICHARD SPRIGUE who, in Mr. WELFRER's opinion, has said and published some very irresponsible statements concerning the captioned assassination.

1. 4. 5. 23

Mr. WEISBERG further advised that wother friend of his, to comes many firearms sent him the bullet labeled C which is allegally the same type which killed fresident KENNEDY since this friend aid not know that Mr. WEIGBERG has his om rifle and bullets with which he has made his own duplicates of the bullet which killed fresident KENNEDY and better known as Warren Commission Exhibit #399.
