

Dear Jim,

11/8/84

Quite some time ago I started going through a box of copies of DL 89-43, clearly intending using them in a large appeal to Shea because the first few pages of the appeal are at the front of that box. When I started going through these copies I found some that we used in lawsuits. Feeling less than 100% yesterday (but closer to it today) I started going over all those records. I finished that today (I being this the 7th but will conclude tomorrow, I believe) and will send most to the archive. A few that may be dupes will go into subject filing and I write you about the others, which you may find of some use if there is a remand in 0322.

89-43-905? may have been sent to you earlier. It is a statement that evidence is required to be preserved and thus is pertinent to the missing spectro curbstone film and the missing Stombaugh shirt-collar examination report (226)

89-43-9647 was originally 137-1292-26. This illustrates, as I attested, that the FBI has a special form covering agent interviews with informers.

89-43-2474 identifies a second Demohrenschildt 105 file I do not recall receiving or on the search slip. It also refers to a 100 file not to the best of my knowledge on that slip or provided.

89-43-25 is marked to be carded, possibly as tickler. If intended for indexing, indexing is indicated on the record itself <sup>not</sup> practise. How this is done is seen on 89-43-9645, when indexing is indicated by underscoring. With regard to the mention of Oswald's visit to the D- office, which also could have been underlined for indexing, it wasn't but the subject is written on at the bottom of the page, ~~is~~ again suggesting tickler.

89-43-8101 and 8424 indicate that all the field offices established files on known critics. The former is a LA SA's report on what was told him by an informer who attended meetings of critics. (Note "S-297/hc" at end.) The Phila report was sent to Dallas. It includes Salandria and mention of the JFK assassination at the peace meeting covered by an FBI informer whose number is withheld.

89-43-5613 is the voluntary disclosure of the names of all FBI Dallas personnel, including their home addresses and phone, yet their names were withheld from disclosed records allegedly to protect their privacy, which did not exist. I think this makes it apparent that other than harassment the real purpose served by withholding SA names is to hide who failed to do what should be done or reported incompletely or incorrectly.

89-43-9872-6 indicates that even when the search of FBI records discloses existence of what was requested under FOIA and even with a Congressman involved the FBI did not disclose that it has what was requested. The first record identifies exactly where the requested pictures are filed. The last record has written on it the fact that a copy was made for FBIHQ 66-1721, suggesting that 66 is also used for critics. While it might relate to the Director's correspondence I do not recall seeing that on any disclosed record.
