PH - DL 100-10461 "Inventory Worksheets." Enclosed are a couple of copies of those Mark Allen asked for when he was here and of a couple I spotted in skimming to locate those to wanted for copying. I've not has time to examine alt, several fat volumes. If these suggest anything please let me know. I intend to go over the entire file of these property records if there is a remand on appeal in 75-226, the spectro/NAA case. ... ot that the JFK case evidence appears to have been filed in Dallas as an LHO case. This could mean that in a search of 89-43 searchers could have avoided these 100-10461 records. ... One refers to an Oslwad latter to a At. Rec. Bureau, with no action indicated. I find it hard to calieve ther. was no inquiry into any LHO letter. ... If you believe items of evidence may be hidden in these inventory records your may want to review those volumes. They are not numbered, other than by file number, and are at the end of the 100-10461 processing worksheets. ... I don't know what attention the Dealey Plaza New Irregulars jot in the papers you see. I've seen only the WxFost story. It recounts what I do not regard as a serious test procedure, one that cannot satisfy serious people of either side in the controversy so I'll be interested in any coverage you see. Do you know whose "theory" it is that Jack Ruby shot JFK from the grassy knoll? Insane using that or taking his pistol to DC to test in "Mais crimes when it is known that the pictal was sold to him new by Prantley. This to they see now building Ruby in the Mafin's bitean. (I've had no press inquiry relating to dide except their "on wewhall mentioned in when he croke to be about an entire by different matter yesterby.) HW 8/22/78
