

86. My writing is critical of the FBI. it also is factual and is based on the FBI's own record and records. Words I used in 1965 and 1966 in the titles of books, while they may have appeared extreme then to those who lacked my knowledge, are in everyday use now. Such words as "Whitewash" and "Cover-UP" are the identical words used in the reporting of the initial releases.

87. As sample of what caused more FBI animosity toward me and more determination by it to ruin me or at least frustrate me to the degree possible I attach two review of my book on the King assassination. Both make clear that the book is an exposure of the FBI. (Exhibits _____ and _____)

88. Those now in the FBI are not those who fabricated the earlier defamations of me. They therefore had no way of knowing that these were contorted, ^{ions} misrepresented ^{ions} and fabrications. I did write to the FBI correcting those errors under PA. However, since ~~in~~ my destruction of the FBI's paranoiac mythologies I have not received another record relating to myself.

89. Were it not at once so juvenile and so ^{ridiculous} ludicrous what the hierarchy had to do to would be laughable. In my first book console the then Director ~~when~~ I accurately reported that he had misinformed the Warren Commission. I cite this also as an example of the FBI's inability to flaw my work on accuracy, despite the flow of Hooverese rhetoric on the subject.

90. The Commission asked this fabled investigator why Lee Harvey Oswald had not shot at the President as he approach the alleged sniper's lair. Mr. Hoover responded that there were trees in the way. The Commissioners, who saw the emperor's clothes, left it at that. I did not. I quoted the transcript of this incredible error and accompanied that with a Secret Service picture. This picture shows that there were no trees at all in the way of the approach - in fact none on the entire street. The top brass of the FBI, after suitably comforting words to the Director about me, told him that there were indeed trees elsewhere in the area, and that once the motorcade made a left turn there would have been trees in the way, thus it was right and proper for the Director to refer to the presences of trees and he was right and I was wrong. ~~The text of this document is a copy of the original document and is not to be used for any other purpose.~~
