

Dear Bill,

5/21/94

If the horse that let you down in the Derby is running in the Preakness today I hope he recaptures some of your bangtail judgement for you. It should not be a muddy track but I doubt it will be dry. The Preakness there is to them like the Derby to you.

Thanks for the Corbin paper. Did you notice that it, too, says "never again"?

It was no secret that even as a Congressman Nixon was an anti-Semite. As v.p. he was openly insulting to some Jews associated with him. On his un-American committee he did have a few Jews because of their red-baiting records and knowledge. He was then a native fascist, whether or not he ever changed. They have just about always been anti-Semites, wherever they are or were.

It is my recollection that some ammo was found in the Faine garage. Or was said to have been and I cannot dispute what the police reported. I think I printed an inventory of what they found. I know I have it somewhere if I did not print it.

I had encouraged Gary Aguillar, San Francisco ophthalmologist, to phone Tague. After speaking to him Tague phoned me. Dr. Doswell also says Posner never interviewed him. There may be more.

Please keep it to yourself for now but Case Open is being used in a lawsuit against Posner, Random House and the NY Times. Roger Feinman, a friend from whom he was with CBS News and a lawyer for some years has filed it for Groden, over an ad in the Times, not as libel. If the case is not now dismissed I think RH will want to settle and for that it will want confidentiality. When the RH lawyers dumped a pile of crap on the judge, the Posner book and a big selection of laudatory reviews, Feinman used Case Open to tell the truth about Case Closed. He did a fine job. I had very few corrections to make. I would have used a few more short paragraphs but he may be saving what I would have used and he didn't for the case if it is not tossed out. He had to file yesterday. With these few and minor corrections he should have had the affidavit by 10:30 a.m. day before yesterday, so he had time to make the copies and file yesterday. We'll see if that has any impact on RH and its prestigious counsel, experts in 1st amendment cases. Unless if there is a settlement and the judge seals the records under it the truth about Posner is now a matter of court record and thrown in his face he decides whether to confront it or not. They have two weeks to respond and I think that is it, that Feinman gets no further chance. I expect the only way they can respond is by attack on me. I hope there can be a means of addressing that on the record. If there isn't I'll write the judge, under oath myself, and set the record straight. That will make another case against Posner and his book, I think. I can allege misuse of the judicial process? Claim personal privilege?

Brave man, that Prof. Ambrose. After it is public he says Nixon was all those things. But he does not say he knew it or said it earlier, when he could have been hurt, like by being made an "enemy."...I know nothing about Dally Graham but that kind of belief is

not foreign to preachers like him and from the south. Where the view was that of most of their followings.

I do remember Meader and his JFK record that got enormous play on radio but not Wyle.. There are a number in Hollywood who do not agree with the official mythology but few do that in public.

My possible influence on the Elders of Zion types ended when I smoked William Dudley Pelley of the Silver Shirts out. And that was in 1959. Guess I've been on the wrong side because none of them in the media give a damn about me. Did you know that Henry Ford distributed those fakes? Had a Sunday night radio hour, prime time, and an anti-Semitic spokesman on it, W.J. Cameron. They offered free Proctocol copies on that show and printed it and plugged it in the Darborn Independent, a weekly For<sup>2</sup>/owned. and all that then was ignored by the major media.

Joking aside, I helped with the exposure of Coughlin and that contributed to the DJ telling the hierarchy rein him in or we bring him in.

So, if I had any ~~influence~~ influence, it is of the past and with the wrong side.

The JFK assassination is one issue on which the people have never been fooled. I know from my earliest appearances on call-in talk shows that about half then did not believe and I think that the first influence on the people after the report was out was in making them feel safe in coming out of the closet on it, so to speak. The one thing those who said they believed it found more impressive than anything else is that Bobby K. seemed to accept it. They figured that with him AG he'd have left no stone unturned.

Off to my early morning walking. Our best to you both,

Harold
